TRECE

*Smart and designed concepts for
future recycling and storage*

Sustainability and materials

- The modules are made of 20 % recycled steel with long durability.
- Circular product: modules can be disassembled and replaced, refreshed, repaired, refurbished and recycled.
- The steel frame is made of parts that are joined together by a click method and are detachable for renovation.
- Container with base insert allows the use of paper bag.
- Container and base insert are made of 100 % recycled ABS plastic.
- The rubber inlet is made of black bio-based ECO EPDM rubber.
- KLOSS can hold up to 62-68 L, Small 32-25 L and Mini 11-13 L

KLOSS recycling

Design | Kauppi & Kauppi

KLOSS recycling system reflects our need to separate and organise, putting the right materials in the right bins for recycling. What we used to define as waste is now a material resource that can be reused. All interiors and situations have different requirements, with KLOSS there are almost endless possibilities to build whatever form and function is needed, in any RAL colour you wish. Creative and playful recycling units for all environments.

”Modularity” is the basic idea and design essence of KLOSS. A vast and highly flexible, connectable modular system for recycling. Three different modules, made of steel, provide endless possibilities and shapes. The selection of modules and configuration, together with the choice of colour, top, lid and accessories - gives the recycling unit its final shape and expression.

The KLOSS recycling system grows with two new smaller module sizes and several new features - elevating itself from a modular system to a larger recycling collection.

The new additions KLOSS Small and KLOSS Mini enable waste sorting everywhere - from large spaces and interiors to smaller and more compact environment. The smaller KLOSS sizes fit well into any context where sorting modules are needed, even where space may be limited or where the bins need to harmonise with the overall interior style. KLOSS can blend in or characterise a space depending on the choice of size, composition, colour and accessories.

AWARDS
WINNER

When we launched KLOSS 2023, it became one of our most award winning series due to its modularity.

Etage recycling

Design | Bernstrand & Borselius

Etage is unique with its elegant design and multiple levels that efficiently utilize floor space in small areas. It is made of carefully selected materials and is a practical and stylish waste sorting furniture.

The frame of Etage is made of oak veneer, bent to its shape, and is available in three colour options - mocca stain, oak, or white stain - providing a beautiful contrast to the molded inlets in black or white. These inlets are simple to clean and can be easily replaced and recycled. Additionally, the inlets are angled inward to facilitate proper waste sorting. Symbols are placed on the angled surface to clearly indicate what should be thrown and where.

Etage is now also available as a top-loaded waste sorting furniture. This makes it easy to sort waste and

grow air-purifying plants indoors. On the top, there is a protective metal ring where symbols are placed, which also is easy to clean.

Behind the door, there are inner bins made of 80 % recycled plastic that are easy to empty and keep the garbage bags in place while protecting the fine wooden pillar from any potential leaks.

The planting containers used for plants are also made of 80 % recycled plastic and are stackable.

In summary, Etage, with its elegant design, carefully selected materials, and smart features, is a stylish and practical solution for waste sorting. Specially developed to facilitate sorting and handling in small spaces.

Sustainability and materials

- Inlets made of 87 % biobased PLA plastic (sugar cane). Can be easily replaced and recycled.
- Containers and planting containers made of 80% recycled ABS plastic.
- Frame in bentwood, Oak veneer FSC 100 %.
- Metal details are made of 20 % recycled steel with long durability.

With four different heights, you can choose different volumes for various purposes, making Etage a dynamic waste sorting station.

If you choose to have inlets from two directions, either with full or half inner bins, you get a total of 4 or 6 inlets in a small space, optimizing the sorting.

Behind the door, there are inner bins made of 80 % recycled plastic that are easy to empty and keep the garbage bags in place while protecting the fine wooden pillar from any potential leaks.

The planting containers used for plants are also made of 80 % recycled plastic and are stackable.

Personal storage

Cabinet & Recycling unit

Public storage

Space storage

Design | TreCe

Flexible modules designed for both personal and general storage in offices and public spaces. Space is easy to integrate thanks to its consistent and thoughtful design. Well-crafted details such as fully covered doors, shoe shelves, and benches with front panels create a seamless and stylish ambiance. This is also reflected in the sustainability of Space, as it is approved according to Möbelfakta, made from durable materials, produced with social responsibility, and quality tested at RISE.

The modules in the Space series are created to fit together, allowing your imagination to flow freely as you assemble your unique solution. Choose from various heights for frames and fronts. Frames in standard white or painted in any NCS colour of your choice. Doors in painted MDF, any NCS colour, oak and ash laminate with a fully covered design. Open frames such as clothing storage, benches, shoe shelves, etc., are available in any painted NCS colour, as well as in oak and ash laminate. Explore the entire Space series, which includes personal and general storage, wardrobes, seating modules, cabinets, recycling units, and more.

Space comes with a standard plinth. For a different look, the plinth can be replaced with painted leg frames. Leg frames are available in our 11 standard colours.

Locks and Closures

We offer various types of locks and closures for our doors, such as electronic RFID locks, code locks, cabinet locks, padlock fittings, and push-to-open. For network-based locks, contact TreCe for individual advice.

Accessories

For Space storage cabinets, accessories such as movable shelves, carpets, etc., are available.

Customization

Space can be customized in both material and dimensions if you wish to put your own personal touch. Contact TreCe for advice and a quote.

The frames are also available in any NCS. Choose between a variety of frame and door heights.
